ENCOUNTER SUMMARY

Visit type	Outpatient Consultation	Location	Room 204
Chief complaint	Persistent cough and mild fever for 3 days	Priority	Routine

Patient presented with cough, low-grade fever, and fatigue. No shortness of breath reported. Physical examination showed mild throat redness and clear lung sounds.

VITAL SIGNS

BP systolic	BP diastolic	Heart rate	Temperature	SpO2	Resp. rate	Weight	BMI
122	78	84	37.8	98	16	82	24.6

DIAGNOSES

ICD-10	Diagnosis	Status	Notes
J06.9	Acute upper respiratory infection, unspecified	Active	Symptoms consistent with viral infection. No signs of pneumonia.
R50.9	Fever, unspecified	Monitoring	Low-grade fever reported by patient.

CURRENT MEDICATIONS

Medication	Dose	Frequency	Route	Duration	Instructions
Paracetamol	500 mg	Every 6 hours as needed	Oral	3 days	Take only if temperature is above 38°C or if discomfort occurs.
Saline nasal spray	2 sprays	3 times daily	Nasal	5 days	Use for nasal congestion relief.

LABORATORY RESULTS

Test	Result	Unit	Reference range	Status	Date
Complete Blood Count	Normal		Within normal limits	Reviewed	2026-07-01
C-reactive Protein	4.2	mg/L	0–5 mg/L	Normal	2026-07-01

PROCEDURES AND IMAGING

Procedure / Image	Date	Result	Notes
Physical examination	2026-07-01	Completed	Lungs clear on auscultation. Mild throat redness observed.

ASSESSMENT

Likely acute upper respiratory infection. Patient is stable and does not require emergency care.

CARE PLAN AND RECOMMENDATIONS

- Drink plenty of fluids and rest.
- Avoid close contact with others until fever has resolved.
- Use prescribed medications according to instructions.
- Return to clinic if symptoms worsen or persist longer than 7 days.

FOLLOW-UP APPOINTMENTS

Date	Specialty / Provider	Reason	Instructions
2026-07-08	Primary Care	Symptom review	Schedule follow-up only if cough, fever, or fatigue continues.

PATIENT INSTRUCTIONS

The patient was advised to monitor temperature twice daily, maintain hydration, and avoid strenuous physical activity until symptoms improve.

Emergency guidance: Seek urgent medical attention if shortness of breath, chest pain, persistent high fever, confusion, or bluish lips occur.
